## **SATORI APPOINTS CANNABIS LICENCED GROWER**

**Toronto, Ontario –August 18, 2014 – Satori Resources Inc. (TSXV:BUD) (“Satori” or the “Company”)** announces that Mr. Bill Christie, a licenced grower of cannabis under Health Canada’s Marijuana Medical Access Program (“MMAR”), and cancer survivor, has joined Satori as head of Communications and Marketing, responsible for managing and directing the Company’s online presence in the mining/agri-minerals and cannabis industry.

Mr. Christie is a professional copywriter /ghost writer/ online marketer who specializes in natural resources and alternative energy. His full-service online projects ranged from communicating the intricacies of Ecuador’s first major world-class copper porphyry deposit on behalf of Corriente Resources, to building online interest in the world’s first multi-fuel alternative energy rotary engine for Rotary Power Inc. of Miami. Both of these projects ended in successful buyouts.

Jennifer Boyle, Chief Executive Officer of Satori states “Bill Christie is a key asset to Satori, given that his professional career has been in mining and resource communications/marketing, but notwithstanding that, his knowledge of the marijuana industry is detailed and intricate given his personal medical accomplishments with cannabis and co-mingled agri-minerals”.

In an effort to counter the effects of chemotherapy and the other negative effects of cancer, Mr. Christie obtained a license and to grow his own high CBD cannabis, where he discovered that cannabis was the most effective medicine in his recovery program, which ultimately replaced nearly all other prescription drugs, several of which had negative side-effects.

As a writer, Mr. Christie began to research in detail all aspects of medical marijuana and is currently completing a book on the subject.

### **ABOUT SATORI RESOURCES INC.**

Satori is a Toronto-based mineral exploration and development company that is earning an interest in the Picnic Phosphate project in Port Cartier, QC, holds a 100% interest in the Tartan Lake Gold Mine Project in Flin Flon, Manitoba, and is currently evaluating new industrial mineral projects and negotiating an exclusivity agreement with Homegrown Hydroponics.
